"We have been working with Ronny Antares over the last couple of years doing lot of casual games for desktop, webgames and interactive advertising and working with him has truly been a pleasure. Ronny Antares always delivers high quality music, even when the time is short and he has to deal with little information about the project, the gameplay, the style, and other vital information. He has two great ears and lot of imagination when he has to compose music. He has pure talent and always deliver beyond our expectations!."
